DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/23/06 has been entered.

Election/Restrictions

Claim 3 is allowable. The restriction requirement has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claim 4, is no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. However, claim 13, is still withdrawn from consideration because the claim does not require all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 00/74743 ('743). The '743 reference teaches a catheter that includes a portion that is insertable into the body of a patient and accessible from outside the body once the portion is inserted. The portion has an outer wall, at least one active lumen within the outer wall and a false lumen (15) within the outer wall. The false lumen has a sealed distal portion and a proximal portion. See figure 11. A substrate including an iodine-based substance is capable of being inserted into the false lumen.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over WO 00/74743 in view of Trerotola (USPubN 2005/0055012). '743 meets the claim limitations as described above but fails to include two active lumens. However, Trerotola, among many other references, teaches the use of two lumens to provide a path for multiple infusions and/or withdrawal from the body.

At the time of the invention, it would have been obvious to make the device of '743 with two lumens as taught by Trerotola. The motivation is provided by Trerotola in that multiple lumens provides the user with more flexibility during use and thereby enhances the use of the device.

Allowable Subject Matter

Claims 3-7,9-11,17,29-30 and 32-33 are allowed.

Claims 15-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. USPN 3,598,127 and USPubN 2004/0230162.
